

Gap denotes $t_T - t_k$, the privacy-to-recovery threshold difference. Smaller gap means tighter recovery and lower per-card overhead.

construction	gap $t_T - t_k$	needs curve?	works for $S_5 \times S_5$?
sum-mod-N genus-0, additive	1	no	yes
Shamir genus-0 AG, Reed-Solomon	1	no	yes
Packed Shamir genus-0 ramp, Franklin-Yung 1992	$T - k$	no	yes
Strong-ramp AG on curve S_5 deck, Bring's curve	$2g = 8$	yes, Bring's	yes, $g = 4$
Strong-ramp AG on curve $S_5 \times S_5$ deck	$2g \geq 346$	yes, $g \geq 173$, 15,121 explicit	no, no named curve
Surface AG on $C \times C$ Couvreur and co-authors	$K_S \cdot D$, D^2 -based	yes, surface	research direction
