

$$\text{threshold gap} = 2 \times (\text{genus of the curve})$$

Each protocol fixes its own group and its own curve, hence its own genus.

Secret: 8 face-down cards in the dealer's hidden hand (a magic-trick setup).

Below the left mark: the 8 cards stay hidden.

Between the marks: each extra helper-card reveals one more hidden card; at the right mark, all 8 are revealed.
